## Cisco Training Feedback

I would like to say I was extremely pleased and happy with the Cisco voice classes - it met all my needs and expectations. The instructor is an awesome technical resource and a great teacher. He has incredible knowledge of the subject – I am really so glad you have him at AUK-TDI. He is always quick to provide info needed and always helped me with every problem I have. He has a lot of energy for teaching and makes it fun and interesting. I appreciate the confirmation emails and your flexibility in scheduling times. The facility is comfortable and quiet, great for concentrating. The equipment always works great. He is helpful and supportive with any out of the program questions. The labs for Cisco Voice were very detailed and covered most of the real life scenarios of implementing the things I learned. The instructor went through and explained just about every page of the study material. AUK-TDI is always a pleasure to come to and i would recommend it to all those who would like to advance their knowledge about Cisco training and information technology field in general.

Thank you and keep up the good work.

Sincerely,

**Adrian Dervodeli**
