To whom it may concern:

AUK Training and Development Institute is one of the training institutions which offer efficient training programs. IPKO has the pleasure to write this letter of recommendation ensuring that AUK TDI has provided us with training programs since 2005 and still continues to do so.

So far, IPKO has trained its staff in the following training workshops, such as: Principles of Advertising, International Project Management, Strategic Planning, Human Resource Management and IT and English Training workshops.

A group of 130 shop managers and team leaders attended custom build training in Customer Care and Sales.

Training delivery to our staff was fair, courteous, friendly, helpful, respectful and sensitive. They provided our staff with timely, accurate, reliable and complete information. AUK TDI maintained good working relationship with our staff by understanding their mutual expectations, rights and responsibilities. Trainers equipped our staff with the knowledge, practical skills and motivation to carry out work-related tasks. They helped with ongoing, long-term improvement of employees' skills enabling them to fulfill their potential within their organization.

From the experience that we had with AUKTDI, we surely recommend this institution as a Training Provider.
